move!

MOTORISATION AND HOME AUTOMATION SOLUTIONS FOR INTERIOR
AND EXTERIOR WINDOW COVERINGS, AWNINGS AND PERGOLAS

Bring your home to life

with Somfy

Imagine closing the blinds in your bedroom each night at the touch of a button and being woken by gentle sunlight in the morning, at exactly the time that suits you.

For radio technology that's easy to live with

100% wireless

Limited structural work

100% compatible

Control all devices with one remote control or your smart device

100% upgradeable

Renovate or modernise at your own speed to suit your needs and your budget

With Somfy's range of motorised window coverings, the luxury of controlling your blinds or awnings from any point in your home is possible – or can even be preset to let the sunshine in when you want it to.

With our range of motorised internal and external window coverings, **Somfy will bring your home to life!**

Our **internal** range features automated curtains, venetian blinds, roller blinds and roman blinds which will add a touch of luxury and sophistication to any home.

The **external** automated solutions include venetian blinds, roller shutters and vertical screens which provide security, privacy, sound insulation and improved energy efficiency to your home. These modern exterior options look fantastic and come in a range of colours to suit every façade.

The modern home owner's dream of the 'outdoor room' can also be realised with our range of awning and pergola motorisation solutions.

Somfy's range of internal and external motorisation solutions are suitable for a new build or renovation and can also be fitted to most existing windows. Our products operate with intelligent, quiet motors and electric controls and can be adjusted via discreet wall mounted units, remote controls or direct from your smartphone or tablet with our Apps. Internal and external lighting can also be controlled from this system.

The flexibility of Somfy's solutions allows you to set your window coverings to automatically open or close via a timer. And with the latest available technology, consider installing sun or wind sensors which will automatically adjust your chosen window covering if the weather turns.

Speak to your Somfy Expert retailer to find out about how our products will bring you flexibility, peace of mind and will take your home into the future.

Bringing your home to life inside

Interior window solutions

Before adding motorisation – what is the best product for you?

My priorities	Curtains	Venetian blinds	Roller blinds	Roman blinds / pleated blinds
Privacy	★★★★	★★★★	★★★★	★★★★
Shading	★★★★★	★★★	★★★★★	★★★★
Managing natural light	★★★	★★★★★	★★★★	★★★
Thermal protection	★★★★	★★★	★★★	★★★

Interior blinds and curtains

The visual impact blinds and curtains have on your home is instant and they have been used for centuries for decorative effect and practical purposes.

But the ability to automate them is truly exciting – and you will be amazed at how often you adjust them when it is so easy. Automating control of your blinds or curtains is the simplest way to change how you use your space; quite simply, it changes how you live.

Whatever your design preference – curtains, venetian blinds, roller blinds, roman (or pleated) blinds – they can be operated individually or as a group, and there is a wide range of fabric options to suit every home.

With Somfy motorised blinds and curtains, there is no need for unsightly cords and chains as is the case with a manual system. A young family will enjoy the peace of mind that comes with knowing there is no chance of children becoming tangled in these dangerous cords.

Adjusting your blinds and curtains from the comfort of your lounge is a sophisticated indulgence... are you ready?

Blinds have the option to use wirefree motors which don't require mains connection and can be battery or solar powered

Benefits

- **Automation can be applied to existing window coverings** or can be customised for a new home
- **Provide immeasurable flexibility** in terms of privacy, design, shading, thermal protection, UV protection and managing natural light
- **Are as quick to install** as manually operated blinds or curtains
- **Are protected** – if someone inadvertently attempts to close or open a curtain manually, the automatic override function kicks in
- Can contribute to **reducing heating or cooling costs**
- **No need for unsightly cords and chains** as is the case with a manual system
- **Operate quietly and smoothly**
- **Blinds have the option to use wirefree motors** which don't require mains connection and can be battery or solar powered
- **Are compatible with an interior sun sensor** which can 'wake up' the house
- Can be operated by the **Smooove wall mounted unit**, by **remote control** or via the Somfy Home Automation Apps which allow control through your smartphone or tablet

Bringing your home to life outside

Exterior window solutions

Before adding motorisation – what is the best product for you?

My priorities	Roller shutters	External venetian blinds	Vertical screens
Security	★★★★	★★★	★
Energy savings	★★★★★	★★★	★★★
Sound insulation	★★★★★	★★★★	★
Shading	★★★★	★★★	★★★
Transparency / control of natural light	★★	★★★	★★

Roller shutters

Roller shutters are the perfect option if peace of mind and protection from the external elements is what you require.

Roller shutters provide excellent security, privacy and shade, and reduce external noise, making them an excellent choice for today's busy urban living or for the home which is exposed to the elements.

There are many different types of roller shutters. The choice of slat type, slat size and material will depend on your priorities – talk to your Somfy Expert retailer about which is best for your home in terms of security, noise reduction and energy efficiency.

If your home is already fitted with handle-operated roller shutters these can be motorised.

Benefits

- **Obstacle detection** – they will stop automatically if an obstacle is detected, including frost
- **Settings are automatically maintained** so that the shutter opens and closes perfectly every time
- **Are tamper resistant when lowered** and security can be further enhanced by fitting the roller shutter with rigid links which provide up to 100 kg resistance to lifting
- **Improve energy efficiency** by keeping your house cool in summer and warm in winter
- Are **available in a range of different colours** to suit every façade
- Can be operated by the **Smooove wall mounted unit**, by **remote control** or via the Somfy Home Automation Apps which allow control through your smartphone or tablet

External venetian blinds

With external venetian blinds, you are giving yourself the opportunity to play with light.

The ability to introduce sunshine while still maintaining your privacy changes the way you live in your home; making you more aware of the passage of the sun and how it changes through the seasons. External venetian blinds bring a feeling of luxury and sophistication to any home.

There is a large variety of external venetians to choose from: flat or rounded, wide or narrow, aluminium or wood. The style of slat is chosen for aesthetics but also for performance. These choices directly influence the performance of your venetians and affect glare reduction, lighting, and help to optimise shade or wind tolerance. These factors all contribute to how energy efficient your home can be and you will be surprised at the positive impact on your heating and cooling costs. Ask your Somfy Expert retailer about which external venetians will best suit your lifestyle.

Benefits

- Provide **very good sound insulation**
- Give the greatest ability to **control natural light**
- Can be set to a **pre-programmed 'favourite position'** with the push of a button
- Come in a **variety of different shades** to suit every façade
- **Can be fitted with a wind sensor** which will fully retract the blind position if it becomes too windy
- Are also **compatible with a sun sensor** which will automatically adjust the slats to reduce or increase the indoor temperature and light level
- Can be operated by the **Smooove wall mounted unit**, by **remote control** or via the Somfy Home Automation Apps which allow control through your smartphone or tablet

Absolute versatility allows you to let in as much, or as little, sunlight as you choose.

Vertical screens make any home appear contemporary and stylish.

Vertical screens

As we embrace an open plan lifestyle, the line between indoors and out becomes less defined; exterior vertical screens embrace that concept by filtering the sun rather than blocking it out.

Vertical screens are available in the fabric of your choice but are usually designed to filter sunlight and the view rather than blocking it out entirely, while still maintaining your privacy.

There's a great range of styles to suit your needs. You have many options regarding UV resistance, strength, maintenance levels, and of course colour.

Improved energy efficiency is a huge benefit – the ability to reduce or increase warmth and sunlight provides great benefits in cooling and heating your home. Discuss your options with your Somfy Expert retailer.

Benefits

- **Are visually appealing** and add sophistication to any home
- **Have a discreet and compact motor** which is located in a unit fixed to the façade
- **Are available with or without a headbox**
- **Remove the need for handles, chains or cords**
- **Can be fitted with a sun sensor** and will close automatically if the sunlight becomes strong
- **Are also compatible with a wind sensor** that automatically raises the vertical screen in strong winds to prevent the fabric tearing
- Can be operated by the **Smooove wall mounted unit**, by **remote control** or via the Somfy Home Automation Apps which allow control through your smartphone or tablet

Live the indoor life outdoors

Outdoor living solutions

Before adding motorisation – what is the best product for you?

My priorities	Awning	Pergola
Space	Open	Open or closed
Somfy compatible equipment	Lighting Sensors Roller pelmet	Lighting Sensors Vertical screens
Type of protection	Sun Rain	Sun Rain and wind Privacy

Awnings

Awnings give you the flexibility to temporarily protect areas from the sun or rain without the commitment or cost of a permanent structure.

Combining the sleek and attractive awning with the ability to expand or retract it at the touch of a button ensures it will be well used.

Awnings are available in a seemingly endless array of fabrics and there are many options to prioritise – weather-proofing, UV-resistance, strength, durability, shade provision and aesthetics all come into play. The awnings come in three styles – Folding arm awning, Semi-cassette awning and Cassette awning.

To enjoy your evenings outdoors lighting can also be incorporated with the ability to be turned on and off via remote control, and can also be set to a timer. Lighting can also be incorporated into gardens or paths, making the space even more versatile. Your Somfy Expert retailer will help you make the right choice for your outdoor space.

Awnings can be wide, elegant, sturdy structures which bring new life to your outdoor space.

What to choose

Folding arm awning

The frame and fabric of your awning stay in the open air once the awning is rolled up.

Semi-cassette awning

The fabric of your awning is rolled into a case, giving better protection from the weather. The arms stay outside.

Cassette awning

Fully concealed cassette housing provides complete protection for the awning mechanism, arms and fabric of the awning.

Benefits

- **Controlled at the touch of a button**
- **Can be used with a sun sensor** to automatically extend when the sun comes out
- **Are compatible with a wind sensor** to retract automatically if it becomes windy
- **Are available in countless fabrics**
- **Can incorporate lighting control** in the awning and garden
- **Extend the life of the fabric inside** the cassette by the motor slightly 'releasing' the fabric when it closes
- **Possesses a 'soft close' function** to preserve the mechanism
- Can be operated by the **Smoove wall mounted unit**, by **remote control** or via the Somfy Home Automation Apps which allow control through your smartphone or tablet

Pergolas

Pergolas are transforming our backyards with the concept of the 'outdoor room' – an outdoor entertaining space that becomes an extension of our home and our lifestyle.

Pergolas are easy to install, less costly than a verandah and are stronger than a retractable folding arm awning. They can be customised to suit virtually any outdoor space and are seen as a new level of luxury in outdoor living.

Pergolas can include a retractable roof system, an opening roof system or straight drop screens which act as walls for added luxury and comfort. Add remote controlled lighting for the pergola, garden or pool and you have created an entertainer's paradise.

Your Somfy Expert retailer will share all the options for a pergola with you, and help you to create your own outdoor oasis.

Benefits

- **Can be used with a sun sensor** to automatically close vertical blinds on the pergola when the sun becomes strong to protect plants or outdoor furniture
- **Are compatible with a wind sensor** to retract automatically if it becomes windy
- **Can incorporate lighting control** in the pergola, garden or pool
- **Close neatly and smoothly** to preserve the mechanism and the fabric
- Can be operated by the **Smooove wall mounted unit**, by **remote control** or via the Somfy Home Automation Apps which allow control through your smartphone or tablet

Create your own backyard oasis
which will change the way you live.

Somfy control solutions

Bringing your home to life at the touch of a button

Find the perfect way to operate your home's automated solutions

The convenience and simplicity of tomorrow's home is available today. With Somfy myLink and TaHoma™ One Home Automation solutions and Apps you can control your automated window coverings and lighting from your smartphone or tablet.

That's a luxurious option but is also hugely practical: you can close the curtains and turn on the lights from the comfort of your lounge; adjust the blinds to reduce glare on your monitor from your desk; close the awnings on your deck if it starts to rain without getting wet yourself; you can even pre-program scenarios to mimic activity in your home if you are away, or simply to get your household moving in the morning! With Somfy myLink you can even operate your automated window coverings when you are away from home using your smart device.

Once you've experienced the practical sophistication of Somfy myLink or TaHoma™ One you'll wonder how you ever lived without it.

Somfy myLink

The Somfy myLink system is the most versatile way to get your home moving. It controls all Radio Technology Somfy (RTS) motorised products via a small, discreet, cordless unit which plugs directly into an existing power point. With Somfy myLink you can control your RTS motorised products with your smart device – even when you're away from home! The device communicates over your home's WiFi network or, when being used remotely, via the 3G/4G internet network. Simply plug in the cordless unit, download the free Somfy myLink App to your smart device, follow the on-screen set-up and you are ready to remotely control all your motorised applications – there are no cords and no wires. You can also schedule scenarios on a seven day plan to get your home moving!

Somfy myLink system is the most versatile way to get your home moving

TaHoma™ One

The intuitive and easy to use TaHoma™ One App is free to download for Android or iOS. It controls all Radio Technology Somfy (RTS) motorised products via a discreet box which is hardwired into your home's power supply. TaHoma™ One communicates over your home's WiFi network.

Create scenarios up to 20 days ahead or consider a seven day schedule to complement weekdays and weekends. It will bring your home to life!

TaHoma™ One, the heart of your connected home

Wall mounted controls

The Smoove wall mounted control is available in three finishes for the display screen and seven contemporary frame colours to suit any décor. Suitable for all Somfy RTS motorised internal and external products, each Smoove unit operates a single product, or a single group of products.

Smoove 1

Operates all roller shutters, internal or external vertical screens, blinds and awnings

Smoove 1 O/C

Operates curtains

Remote controls

A remote control puts functionality in the palm of your hand and will bring your home to life! The remotes are suitable for Somfy RTS motorised roller shutters, external venetian blinds, internal blinds and curtains, and awnings.

Telis 16 RTS

- With 16 channels, you can assign a different function to each channel, using a name, icon or number for easy operation. Close a single blind or activate a suite of functions at the touch of a button
- Intuitive programming

Situio RTS

- Available in 1, 2 and 5 channel versions to control one or multiple window coverings
- Use “my” button for quick access to your preferred position
- Available in four striking colour options: pure (white), silver, gold and rose gold

Telis 6 Chronis

- With six channels, you can assign a different function or scenario to each channel, to close a single screen or suite of functions with just one touch of a button
- Different functions or a suite of functions can be controlled with the automatic timer, with different days programmed to different scenarios

Telis Mod/Var

- Specifically for any type of blind with a tilting blade, the revolutionary central thumbwheel allows you to adjust slats, such as those on a venetian blind, precisely and swiftly

Sun, wind and temperature sensors

Sensors give your home a life of its own. Sun sensors will automatically lower your shutters or screens when the level of sunlight increases, to help keep your home cool; a wind sensor will retract your awning if it gets too windy or will raise external screens to prevent the fabric tearing; and an indoor temperature sensor will adjust venetian blinds or close curtains based on a preset amount of sunlight and inside temperature. Sensors are available for all motorised products.

Thermosunis WireFree™
100% wireless indoor sun
and temperature sensor

Eolis 3D WireFree
100% wireless wind sensor for
external folding arm awnings

Sunis WireFree
100% wireless sun sensor
for the façade or pergola

Each day, 400 Somfy engineers work towards increasing the comfort, safety and functionality of our homes.

We are Somfy

Our dedicated team registers more than 40 patents each year as we strive to bring the technology of tomorrow into your home, today.

Somfy is the leading global manufacturer of intelligent quiet motors, electronic controls and home automation solutions for interior and exterior window coverings.

For more than four decades, Somfy engineers have designed solutions for both the residential and commercial markets to motorise window coverings such as blinds, curtains, awnings and roller shutters.

Guarantee

All Somfy products, including the motor operating life and automatic controllers, are thoroughly tested under extreme conditions to guarantee durability for five years. TaHoma™ One has a two year warranty.
